

**Interview Questions****Introduction:**

My name is Sacha Barber, I am a student at Sussex University studying Computer Science and Artificial Intelligence. I am planning to make a MP3 organizer / player that enabled users to construct play lists on one computer and then send these play lists to a 2<sup>nd</sup> computer for playing. I am conducting this interview to gather user feedback regarding the design of the initial prototype. The results of these interviews will be analysed and enable me to re-design the final product, in the best way possible taking into account these results.

**INTERVIEWEE DETAILS**

Name:

Age:

Gender :

Job Title :

Experienced PC User :

(Yes/No)

Experienced WEB User :

(Yes/No)
